

GREG DUNNE (OC 2000 – 2005)

Since leaving Caterham I have obtained an undergraduate degree in Law from Canterbury Christ Church University, before going on to obtain a Masters in International Law and International Relations from the University of Kent. While studying as an undergrad I represented the university in both national negotiation and mediation competitions and went back to coach competitive negotiation whilst studying for my master's degree.

After finishing university, I moved back to Surrey and now both live and work in Caterham.

For the last three years, I have been working for a start-up company working in the Business Telecoms sector, taking on a variety of roles in the business as it has grown.

I started attending the Old Cat's events around 18 months ago when I went to an OC London networking event and, since then, have been to many of events both at the School, and in London. Attending OC and School events has been a great way to reconnect with old classmates and meet many new Old Cats, and I would like to be part of helping these events to continue and thrive.

I am also currently excitedly expecting my first child with my long term partner.
